An Indiana Woman Tells How She Was Cured by the Use of Dr. Williams' Pink Pills.

There are women whose lives are continual rounds of suffering simply because the blood lacks the strength to make the functional activities of the body normal, without which no woman can enjoy perfect health. Dr. Williams' Pink Pills are in this respect a blessing to women, since they build up and strengthen the blood, repair the harm caused by overwork and worry, and cause a large percentage of women's ills.

Miss Florence M. O'Brien, a dressmaker, of No. 205 Flora street, Washington, Ind., gladly tells of the benefit she received from Dr. Williams' Pink Pills, as follows:

"I had terrible cramps and vomiting spells regularly which lasted for several days. I was dizzy and awfully sick, was very much constipated, my stomach became disordered and bloated and at last got so sore and tender that I could not bear the least pressure upon it. The doctor with whom I treated said my trouble came from lack of out-door exercise and too much work running the sewing machine, and he did not help me and I found no relief until, upon the recommendation of a friend, I began taking Dr. Williams' Pink Pills. I was soon helped and, after taking a few boxes, I was completely cured. I have remained in good health and recommend Dr. Williams' Pink Pills everywhere I go."

Dr. Williams' Pink Pills are the great discovery of modern times for suffering women. They are a positive cure for their particular ailments, are unequalled as a blood builder and therefore as a tonic for the whole system.

If you are interested in the remedy that cured Miss O'Brien, write today for our booklet, "Talks to Women." It is free and will be sent postpaid.

Dr. Williams' Pink Pills should be used in all diseases caused by thin or impure blood, as anemia, rheumatism, stomach trouble, after-effects of the grip and fevers, neuralgia, sick headaches and many forms of weakness.

Dr. Williams' Pink Pills are sold by all druggists, or sent postpaid on receipt of price, 50 cents per box, six boxes for \$2.50, by Dr. Williams' Medicine Company, Schenectady, N. Y.

Virginia Mechanics' Institute

Opens With Enrolment of 400—Last Year, 323.

In the office of the superintendent of the Virginia Mechanics' Institute the busy work may be more closely related to their best effort and that their school work may be more closely related to the practical work in the shop or office.

WORKMEN BUSY AT FAIR GROUNDS

Great Activity by Army of People, Getting Everything in Excellent Shape.

Out at the State Fair Grounds these days things are going along briskly, and there is a veritable little city of white ready for the thousands upon thousands of visitors who will come pouring in on every train next week.

Everything looks as spick and span and clean as possible, and only the hurrying, scurrying, curious crowd is to the scene.

An army of employees is at work on all parts of the grounds. A large corps has been plying the whitewash brush, and the new white pine is over all things reliable.

The race-track has been put into fine shape, and rolled, it will be hard and smooth. The roads within the grounds have been rolled and oiled.

Booths are being built at every corner, and the vendors will not be scarce at the grounds. Soon the cry of "hot dogs" and "ice-cold lemonade" will be stridently voiced, and the "ring the cane" merchants will be doing a big business.

The lighting force is hard on the job, and the little city will be brilliantly illuminated at night in every nook and corner.

The agricultural implements are being displayed already on the grounds, and will cover a wide area.

The buildings are all ready for the exhibits, and are decorated in red, white and blue bunting everywhere. The midway, or "Yahoo Lane," as it will be called, is being laid out, and the "speiler" with the melo-low throat will soon begin to rake in the shekels of a curiosity-filled multitude.

The classes met for the first time at 7:30 o'clock, with the enrolment at exactly 400 students, an increase of seventy-seven over last year's first night.

The average age of those entering is a little more than nineteen years, the youngest fifteen and the oldest forty-one.

Large numbers of apprentices have come from the American Locomotive Company, the Southern Railway, the Chesapeake and Ohio Railway, the Richmond Electric Company, the Richmond, Fredericksburg and Potomac Railroad and other shops of Richmond and Manchester.

A new feature of the work at the school this year will be the sending of reports of students to their employers, in order that they may be stimulated to their best effort and that their school work may be more closely related to the practical work in the shop or office.
